GAME PLAY:

At last you have a chance to become the World's Wackiest Racer ever. Based on the original cartoon series and with the complete line up of wacky racers you'll need to negotiate the Grand Canyon, drive through the mountainous Canadian Rockies and put your snow boots on to cross the Arctic to reach the North Pole. Hang on though, what's this! Dick Dastardly and Muttley in the Mean Machine will be up to their old tricks, plotting against you and the other competitors, setting devious traps and doing anything so that they finally win a wacky race!

- **Race** - Negotiate your vehicle and character around the race tracks avoiding obstacles and traps in an attempt to win the race.
- **Traps** - Watch out! Dick Dastardly and Muttley will randomly try to sabotage the race by setting traps around the track such as TNT, glue, oil spills, cluster mines and geysers.
- **Tactics** - The player will be able to collect pickups (such as Nitrous Oxide for turbo boost, hover jets to avoid holes in the tracks and shields to protect from explosions) which will counter the traps that Dick Dastardly and Muttley rig.
- **Explore** - Collect coins to ensure you can progress to the next level if you win your race.
